Report comes from the upper Gila in Arizona, that the Bowie and Northern railroad, in its journey to Globe is ti-d up at Fort Thomas, because, forsooth, the consent of the Indians on the San Carlos reservation must first be obtained before the road can be built across the grounds of that accursed breeding pen. This condition of affairs was brought about by President Cleveland who vetoed the right of way granted the road during the last session of congress. His wishes were then ascertained, and a bill passed in conformity thereto-which was "consent of the Indians." This will be almost impossible to obtain for the reason that the agent in charge is said to be hostile to the measure. However, on this latter point we hope to have still in the experimental stage. been misinformed. A NEW CONSUMPTION CERE According to a Washington telegram a new consumption cure has been reported to the state department by United States Consul Chancellor at Havre. He says the cure was first brought to the attention of the world at a congress of Tucson Thursday Sept. 12, is beyond physicians and scientists at Bordeaux to consider the question of combating consumption by vaccination. Professor Marigliano, av Italian read a paper which attracted much attention, claiming to have discovered an efficacious process for the treatment of consumption by the injection of tubercular serum which he says renders the subjects of the disease immune. The consul recalls the comparative failures of other attempts to treat consumption success fully, and says this particular process is

Mammoth Mining News.

A private letter from Mammoth says:

"We expect to have definite word in a

few days as to whether the Mammoth

and Collins group of mines will begin

operation. The proposition now is to put up a plant that will consume 400 tons of ore every 24 hours. Whether the plant

will be placed at the mine with a pump-

ing plant or at the river with a tramway,

as yet has not been fully decided, but from what I can learn the mines thus far have the best of the argument. The
